Years of  
Platinum Service

Davan Caravans are proud to announce the arrival of the high specification Abbey Cardinal 2008 Range. For 2008 the whole range is yet again packed full of special features and all the favourite designs with the addition of a new twin axle model.

Based on the award winning Abbey Vogue the Cardinal benefits from all the standard features of this range. However, with our added expertise and a remarkable list of extras, we have now put together one of the highest specification models in its class.

Following the revamp of the Vogue last year the Cardinal saw minimum interior changes. However, with a new fabric colour the Cardinal takes on a new warmer look inside. This year sees the introduction of the new 620 fixed bed layout. Launched late in the 2007 model season this twin axle end washroom caravan has been incredibly successful and is comfortably placed at the top end of the Cardinal line up.

Security this year takes a dominant role in the specification. In addition to the passive infra-red alarm system, CRIS identity number and registration we are including the Phantom Pro Active tracking system. The main benefit of the Phantom is that should your new caravan be stolen the Phantom monitoring centre, using the GPS system, can pinpoint the exact location of your caravan enabling the police to make a speedy recovery and catch the thieves. The tracker works equally well when abroad and as it is a 'sold secure' you will see massive savings on your annual insurance costs through specialist insurance providers.

With many other new features the new Abbey Cardinal is well worth a look. New 2008 Cardinals will be arriving at Davan from the 1st September and the range will be on display at the Caravan and Motor Home show at the NEC in October.
